

a new brain. a new beginning.

Higher Brain Living® is a revolutionary gentle- touch technique that consistently and repeatedly creates a surge of energy into the Higher Brain, loosening the grip of our primal 'survival' brain while providing you with a mapping system to help create the life you've dreamed of. For the first time in history, you can actually change the physiology of your brain in order to change your life.

"Phenomenal changes in the brain at exactly the right times with a transition from one state to the other in the prefrontal cortex. I would not have believed that the brain could change so quickly if I had not measured it myself! I am amazed. I am blown away!"

Peggy Montgomery, Ph. D.,
Neuropsychologist, Brain Researcher
& Co-author of the book Whispers
from the Brain following a recent
HBL EEG research project.
